

ABORTion  
is getting harder  
and harder to access in  
America

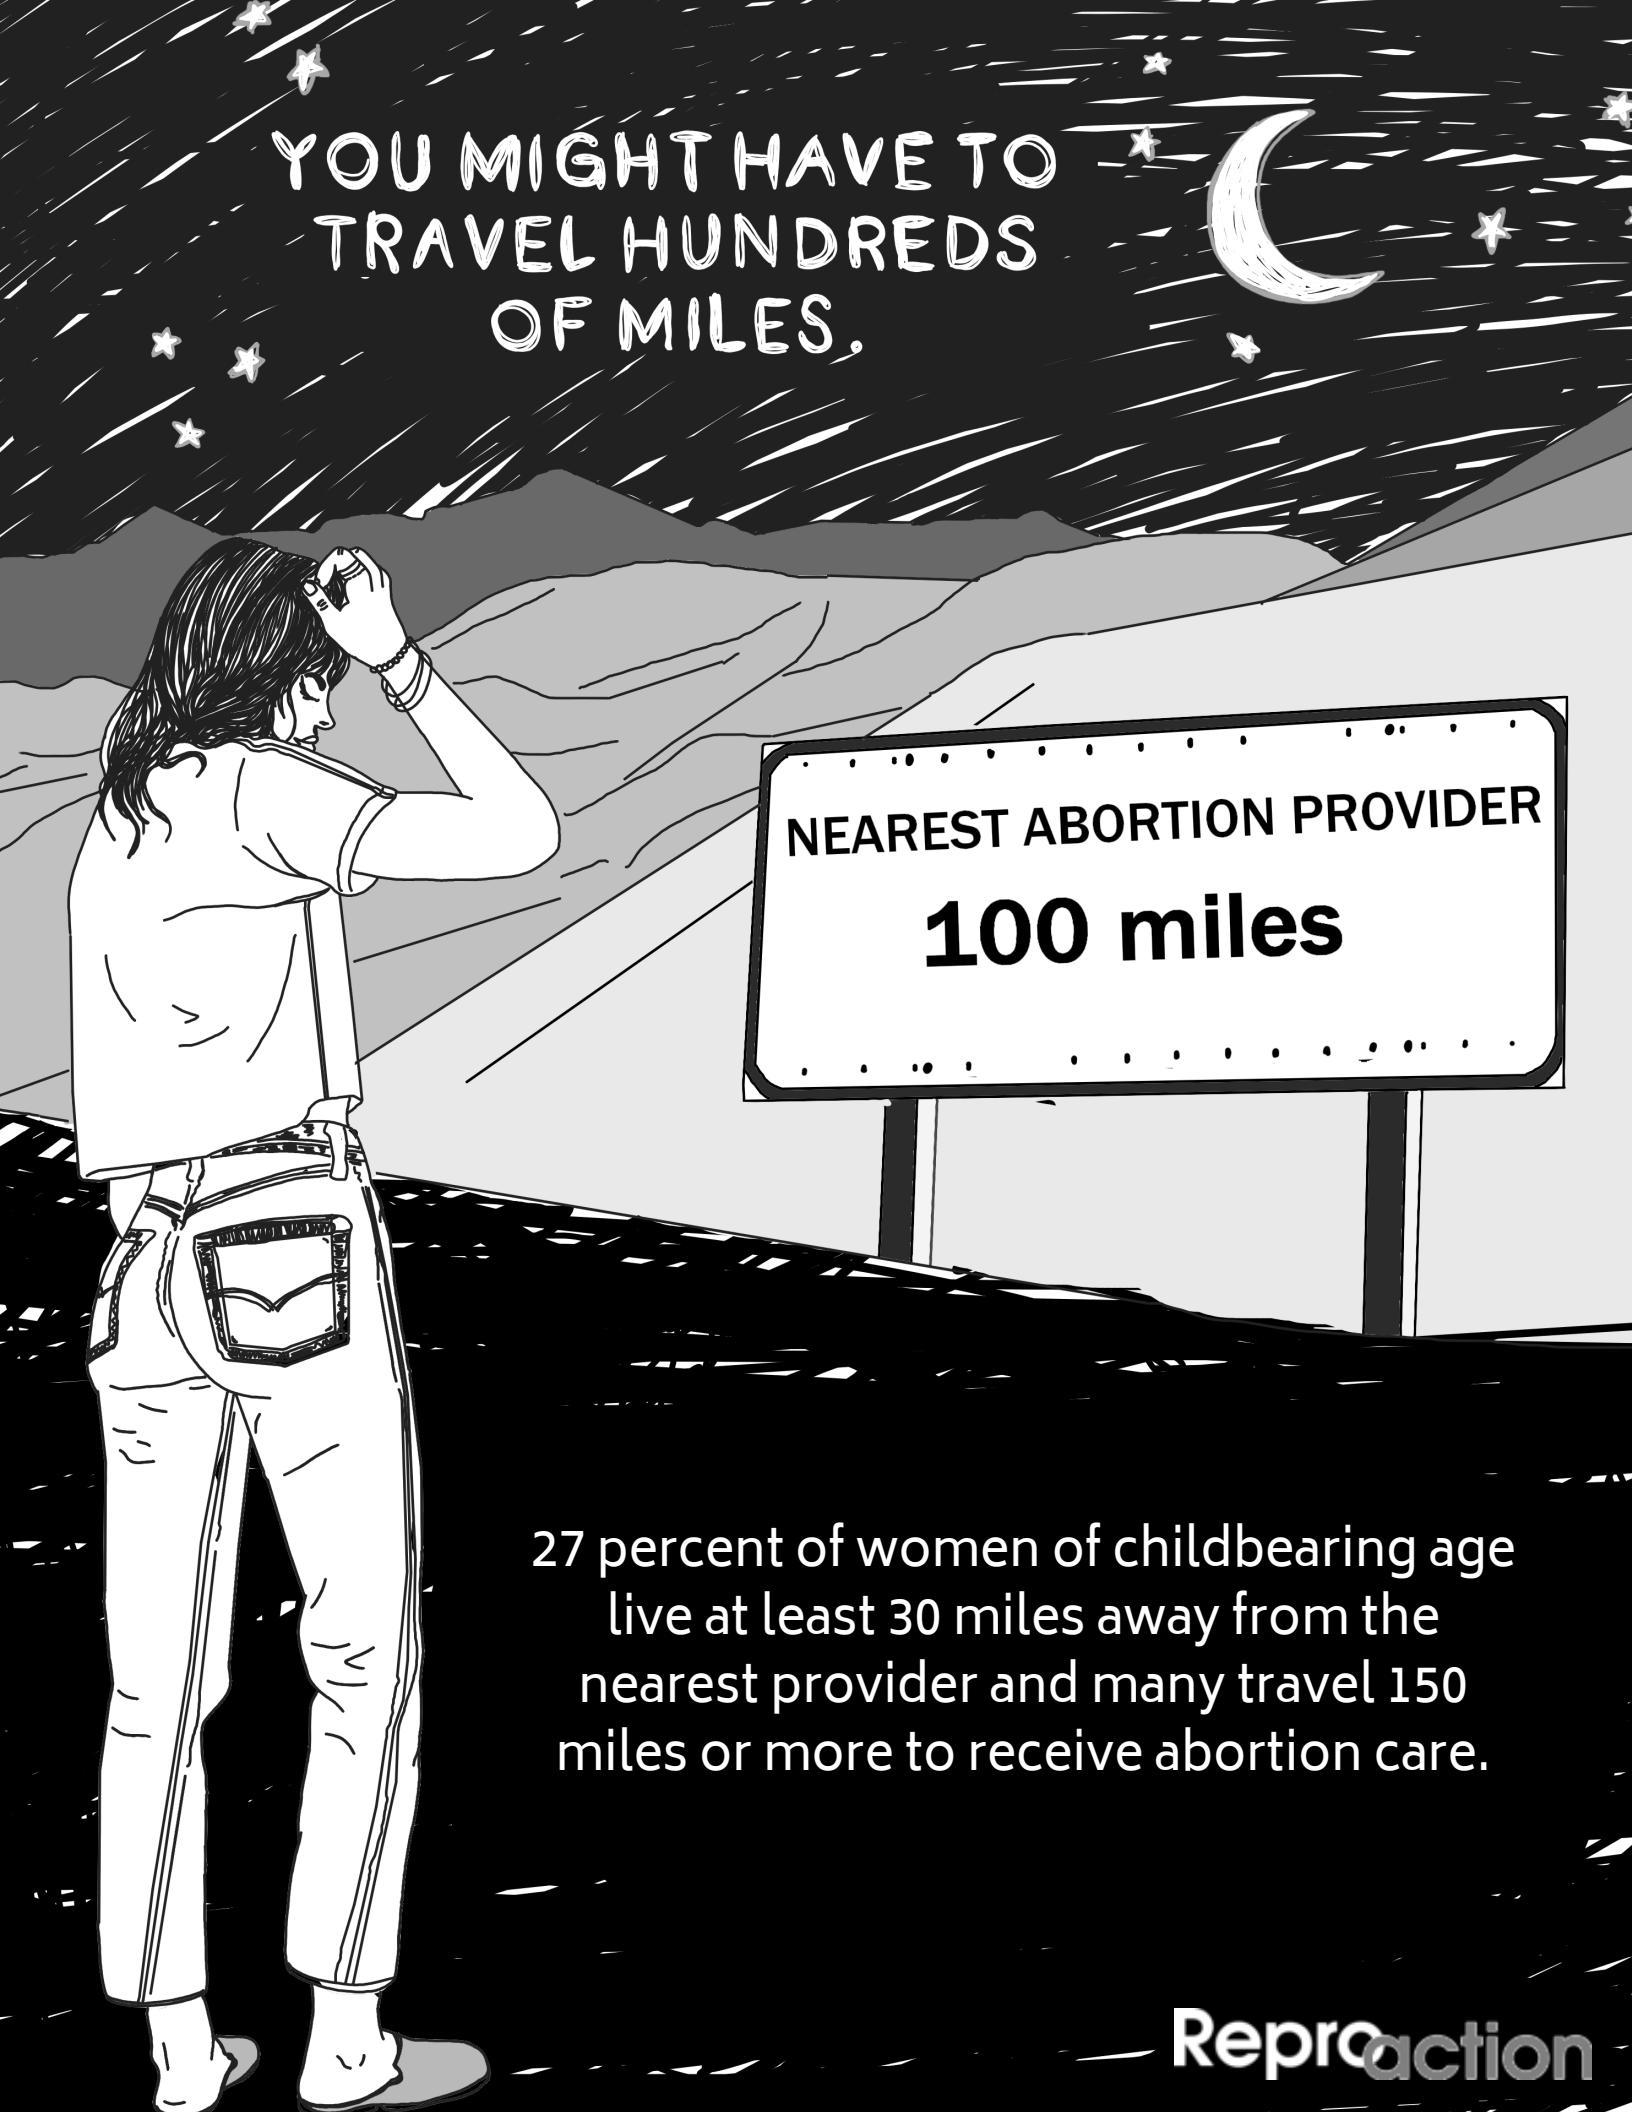

Look at the signs to  
see the barriers that  
keep people from  
receiving abortion care.

# HOW MANY ABORTION CLINICS DOES YOUR STATE HAVE?

Overregulation has forced many clinics to close their doors.  
As of 2017, seven states had only one abortion clinic.

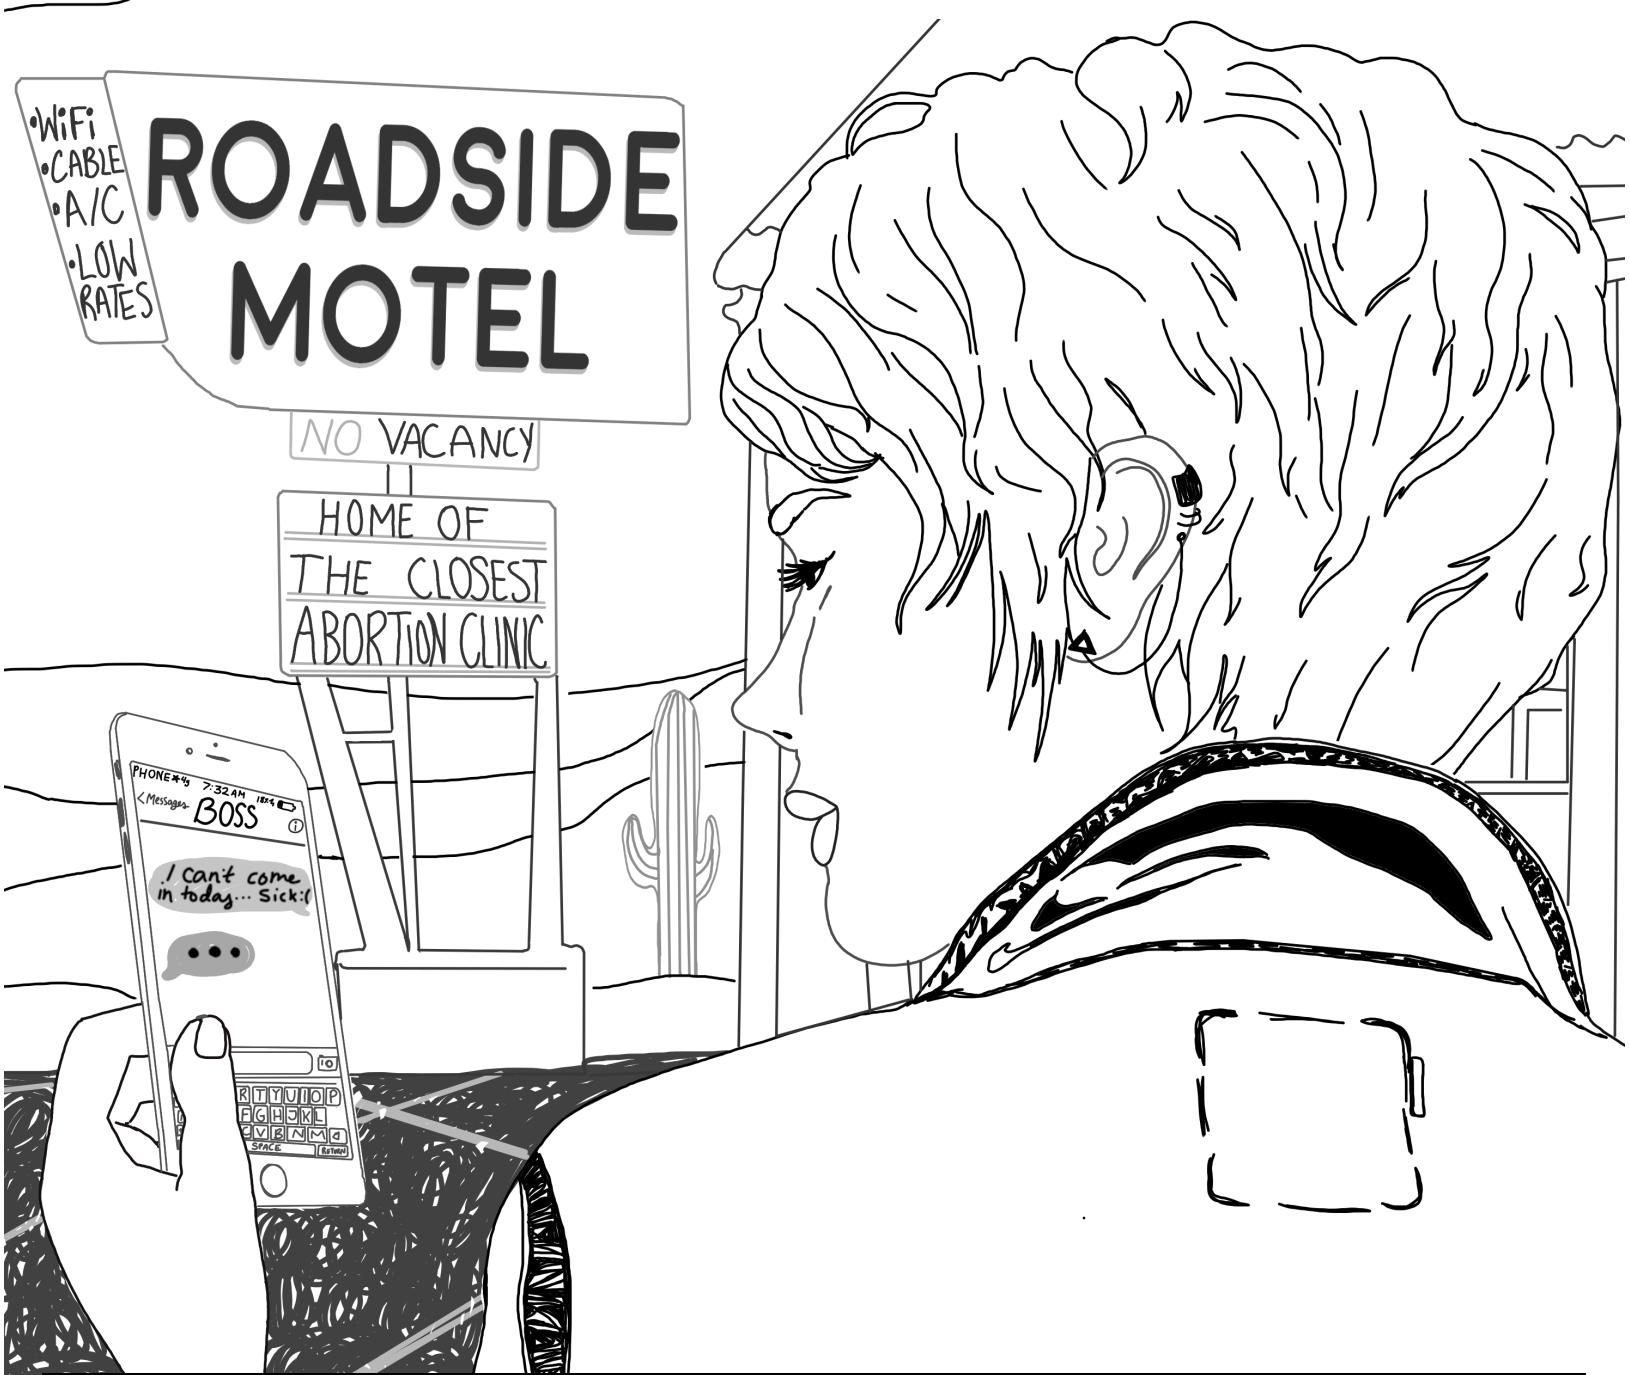

YOU MIGHT HAVE TO  
TRAVEL HUNDREDS  
OF MILES.

A black and white illustration of a woman with long dark hair, seen from the side and back, standing on a dark road. She is wearing a light-colored t-shirt and jeans. Her right hand is resting against her head, and her left hand is in her pocket. In front of her is a large billboard on a metal pole. The billboard has a decorative border and displays the text "NEAREST ABORTION PROVIDER" at the top and "100 miles" in large, bold letters below it. The background features a dark sky with several stars and a crescent moon, and a range of mountains in the distance.

NEAREST ABORTION PROVIDER  
**100 miles**

27 percent of women of childbearing age live at least 30 miles away from the nearest provider and many travel 150 miles or more to receive abortion care.

# TAKE DAYS OFF WORK (WHETHER OR NOT YOU CAN AFFORD IT)

27 states have a mandatory waiting period requiring a pregnant person to wait a specific amount of time – between 24 and 72 hours, depending on your state- after forced counseling before returning to the clinic to receive an abortion.

CHILD CARE IS EXPENSIVE,  
BUT YOU MAY HAVE TO PAY ANYWAY.

59 percent of people who get abortions are already mothers.

Finding and paying for childcare can be a major obstacle when trying to schedule one appointment, let alone multiple.

# DOES YOUR INSURANCE COVER ABORTION? IT MAY NOT

Twenty-six states have laws prohibiting insurance plans from offering abortion coverage as part of a comprehensive health care plan sold under the Affordable Care Act.

# AN ABORTION CAN COST A LOT.

The average cost of an early medication abortion is \$504. A surgical abortion may be upwards of \$1,500. If you have to pay out-of-pocket, the financial burden is a serious challenge.

# THE CLOCK IS TICKING.

The longer it takes to raise the money needed for an abortion, the further the pregnancy progresses, which not only increases the cost but also eliminates options between specific abortion procedures.

# ABORTION SHOULD BE EASIER TO ACCESS.

Not only do we need more abortion clinics and fewer laws restricting access to abortion, it's high time to make medication abortion available over the counter. It's safe, effective, and already an option around the world. It's time to empower self-managed abortion.
